Regulatory Programs

- Work closely with the Seneca Nation of Indians on the development of a first iteration of its Water Quality Standards.
- Provide guidance and assistance to tribal Nations seeking Treatment as State (TAS) authorization for Clean Water Act (CWA) 106 grant funding and other CWA programs.
- Continue to invest in meaningful tribal consultations with Region 2 Nations. Recent actions include collaboration with Region 3 to ensure that all actions (NPDES permitting, pretreatment, UIC permitting) in Pennsylvania that have the potential to impact downstream Nation waters in R2 are addressed via a robust and pre-decisional consultation process. Continue to ensure that Region 2 Nations have opportunities to provide substantive feedback on EPA actions that may affect them (e.g., finalization of the draft Pesticide General Permit (PGP) and Construction General permit (CGP); promulgation of federal baseline WQS for tribal lands).
